修改方案

前端去除非控件兼容代码

删除无控件标识 dom.noActiveX 相关内容

The screenshot shows a GitLab issue page for the project 'chair-react 2.x'. The issue is titled 'chair-react 2.x 有一定几率会出现静态资源路径错误' (chair-react 2.x has a certain probability of static resource path errors) and is marked as 'Closed'. It was opened by user '暂无' (None) 5 months ago. The issue description mentions that sometimes an 'undefined' path appears in the middle of the path, and it includes a screenshot of a browser console error showing a 404 status for a static resource. The error message is: 'GET http://debug005.hpm.alipay.net:7001/chair/undefined/swiftweb/chair.sprint.index.css 404 (Not Found)'. The issue also mentions that switching the endpoint to start 'chair' works, but it's not clear how to reproduce the error. There is one related merge request, 't(local-IP): 注册域名指向本机 IP in chair / egg-staticlocal', which is merged. The issue has one comment from user '冒顿 (mào dùn)' asking for the normal address. The issue is assigned to '冒顿 (mào dùn)' and has a label 'deps: chair-react'. The issue is also referenced in a cross-project reference 'chair/chair#1530'. The issue has 6 participants.

+ NEW ISSUE REOPEN EDIT

chair-react 2.x 有一定几率会出现静态资源路径错误

偶尔会路径中间出现 undefined:

```
GET http://debug005.hpm.alipay.net:7001/chair/undefined/swiftweb/chair.sprint.index.css 404 (Not Found)
http://debug005.hpm.alipay.net:7001/chair/undefined/swiftweb/chair.sprint.index.css
http://debug005.hpm.alipay.net:7001/chair/undefined/swiftweb/chair.sprint.index.js
```

遇到这种情况时, 换个端口启动 chair 就好了, 但不知道怎么重现。。。

1 Related Merge Request

✓ 15 t(local-IP): 注册域名指向本机 IP in chair / egg-staticlocal MERGED

代码提交关系

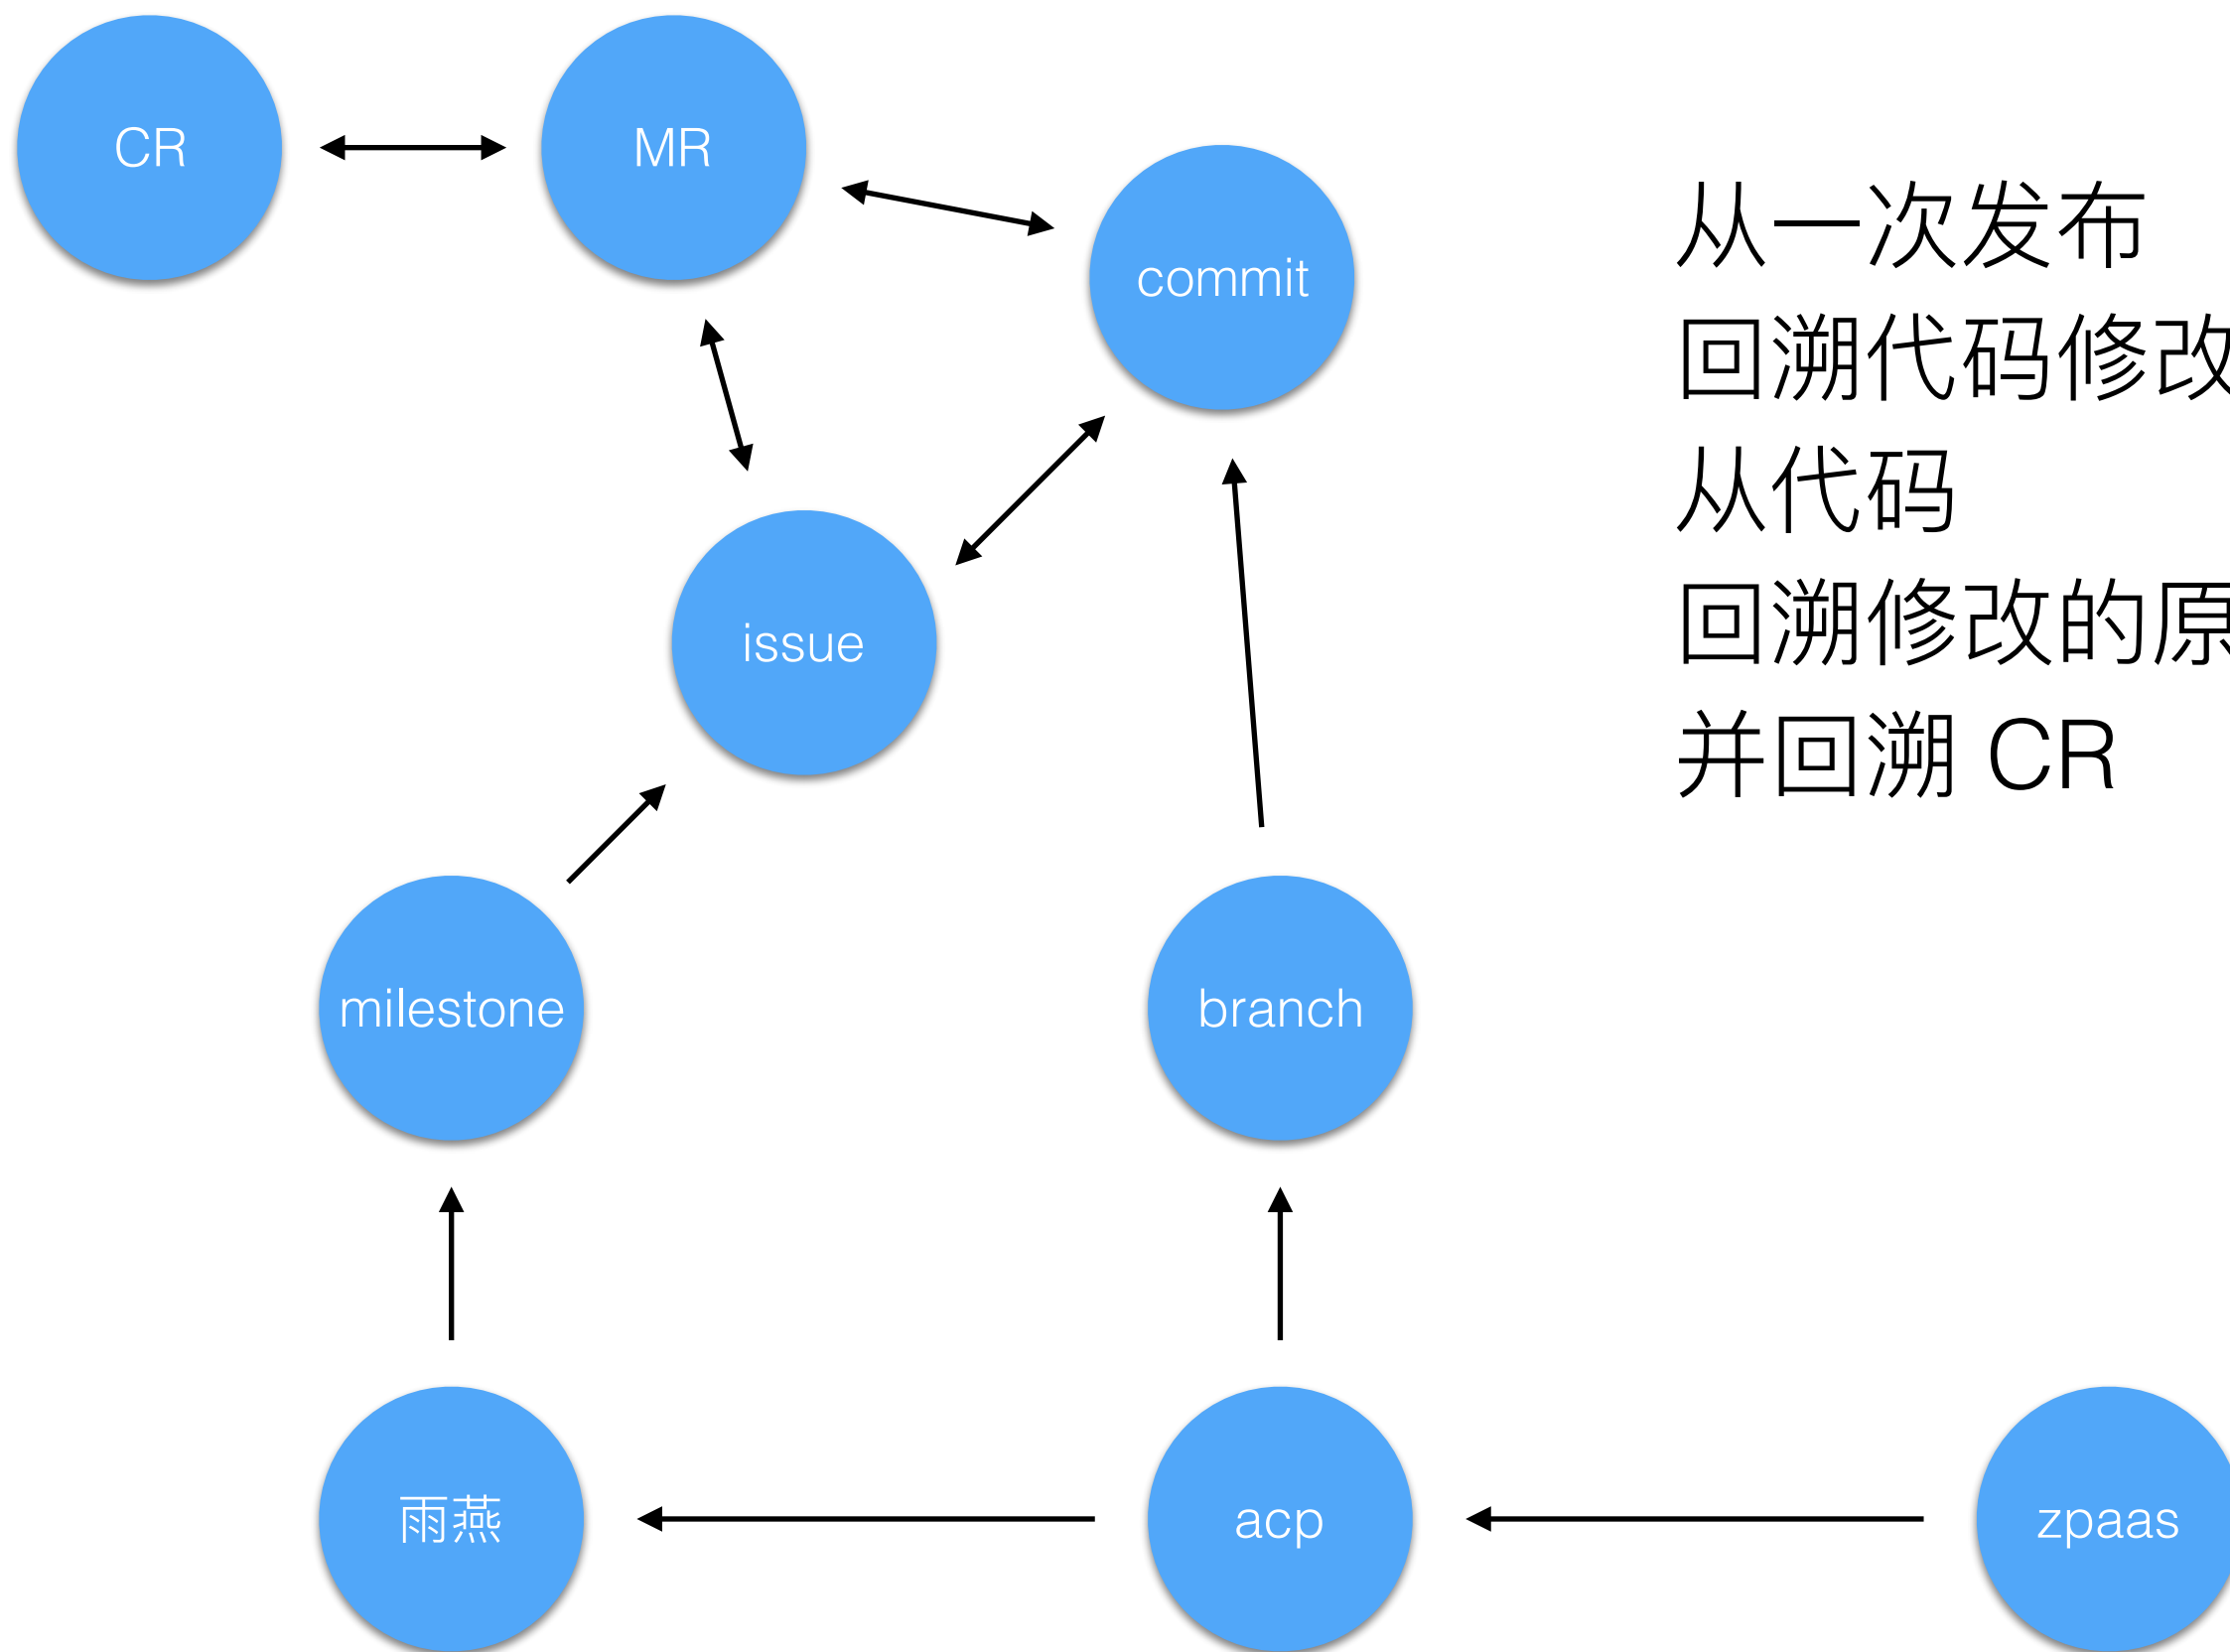

# 为何使用

- 以代码为中心
- 信息同步和落盘
- 灵活轻量
- 开源导向

双向关联

The image shows two overlapping browser windows from GitLab. The background window displays an issue page for 'chair / chair · Issues' with the URL 'gitlab.alipay-inc.com/chair/chair/issues/1739'. The issue title is '不四 @busi.hyy · 15 days ago · 这个是 sofa 启动的时候注册到 configclient, 然后九州会读这份配置 (https://midmng.alipay.com/rest/queryAppCEVersion.json?appName=basement), 最后 xflush 会读九州的这份配置来自动配 xflush 监控。'. The foreground window displays a merge request page for 'chair / chair · Merge Requests' with the URL 'gitlab.alipay-inc.com/chair/chair/merge\_requests/1047'. The merge request title is 'feat: 通过 publishSystemInfo 插件来发布应用信息到 configclient' and it includes the text 'closes #1739'. A red arrow points from the 'closes #1739' text in the merge request to the issue page in the background window. The merge request page also shows a 'Merged' status, the merge request number '#1047', the opener '不四 · 15 days ago', and the merger '贯高 13 days ago'. It includes a build status 'Build passed for dd233d8f' and a list of commits, including 'dd233d8f - test: fix test cases'.

# Issue 管理

状态

筛选

The screenshot shows the GitLab Issues interface for the project 'x-platform / misc'. The URL is 'gitlab.alipay-inc.com/x-platform/misc/issues?milestone\_id=&scope=all&sort=created\_desc&state=opened&utf8=✓&assignee\_id=&author\_id=&milestone\_title=蚂...'. The page features a sidebar on the left with navigation icons. The main content area displays a list of issues. At the top, there are filters for 'Open' (151), 'Closed' (531), and 'All' (682). Below these are dropdown menus for 'Assignee', 'Author', '蚂蚊静态资...', and 'Label'. A 'Filter by title or descript' search bar and a '+ NEW ISSUE' button are also present. The issues list includes titles, IDs, creation times, authors, and labels. Annotations with arrows point to specific elements: '状态' points to the 'Open' filter; '筛选' points to the 'Assignee' dropdown; '排序' points to the 'SORT: RECENTLY CREATED' dropdown; '标签' points to the '蚂蚊静态资...' dropdown; 'milestone' points to the '蚂蚊静态资源全' label; 'TODO' points to the '0-线上问题' label; and '指派人' points to the '指派' icon.

适用于各种维度

适用于项目迭代

问：如何划分仓库

答：在管辖范围内尽量一个

- ✓ 减少人员管理
- ✓ 增强不同小团队间的交流
- ✓ 管理者容易跟进事情进展
- ✓ 足够独立的业务可以分离
- ✗ 信息量大

小技巧

Notifications - Profile Settings

gitlab.alipay-inc.com/profile/notifications

## Notifications

These are your global notification settings.

Notification email:

Notification level:

- ☐ Disabled  
You will not get any notifications via email
- ☐ On Mention  
You will receive notifications only for comments in which you were @mentioned
- ☐ Participating  
You will only receive notifications from related resources (e.g. from your commits or assigned issues)
- ☒ Watch  
You will receive notifications for any activity

[SAVE CHANGES](#)

You can also specify notification level per group or per project.  
By default, all projects and groups will use the notification level set above.

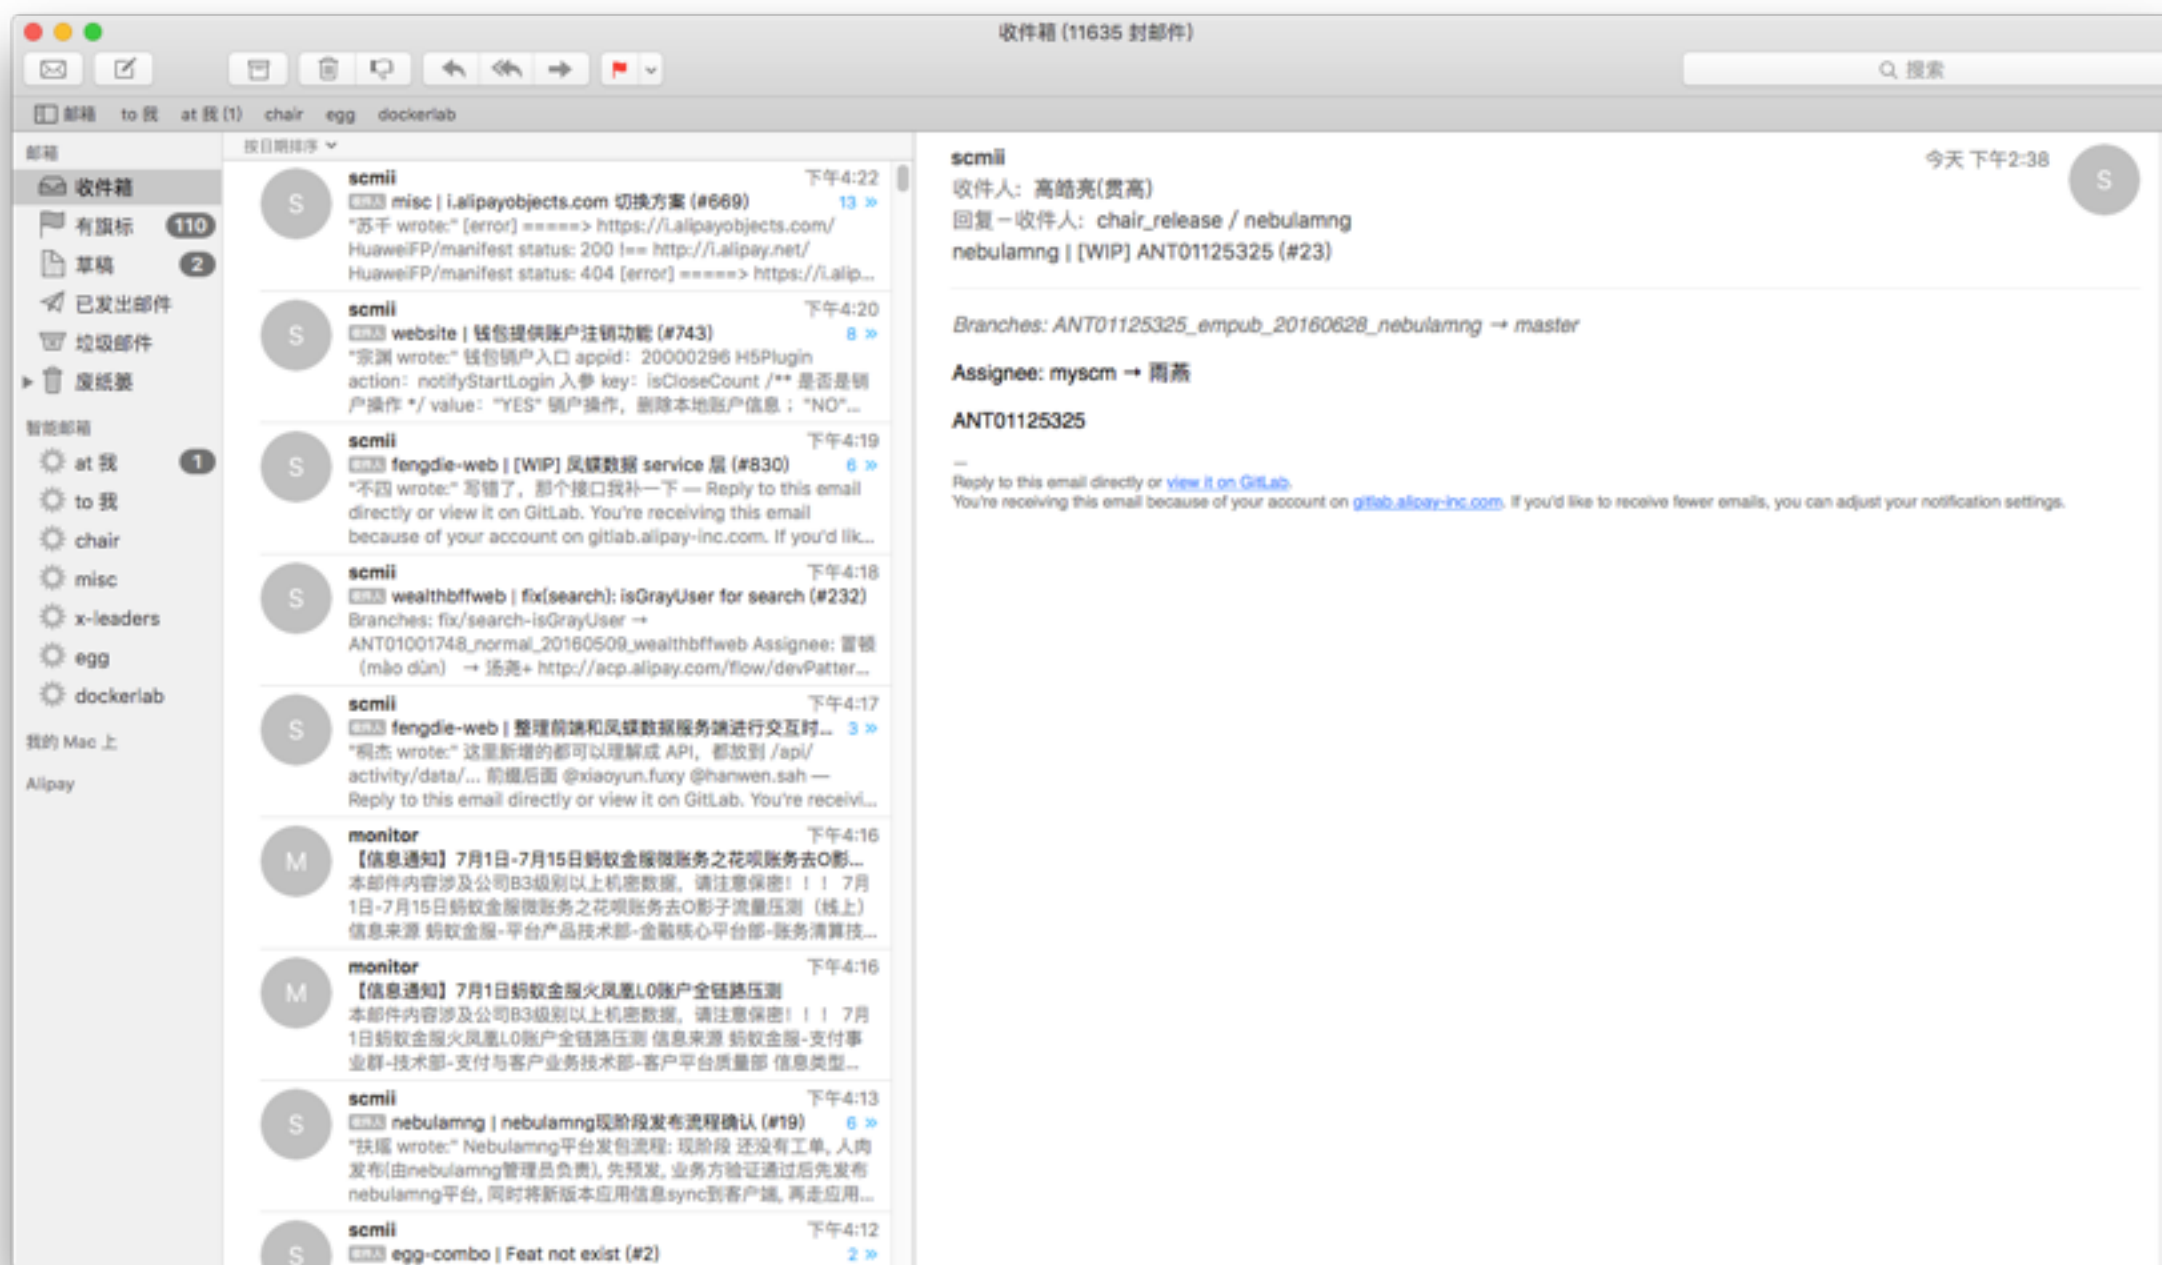

**Groups:**

|               |        |
|---------------|--------|
| page_release  | global |
| dockerlab     | global |
| dockerlabtest | global |
| cicada        | global |
| fengdie       | global |
| QCloud        | global |

To specify the notification level per project of a group you belong to, you need to be a member of the project itself, not only its group.

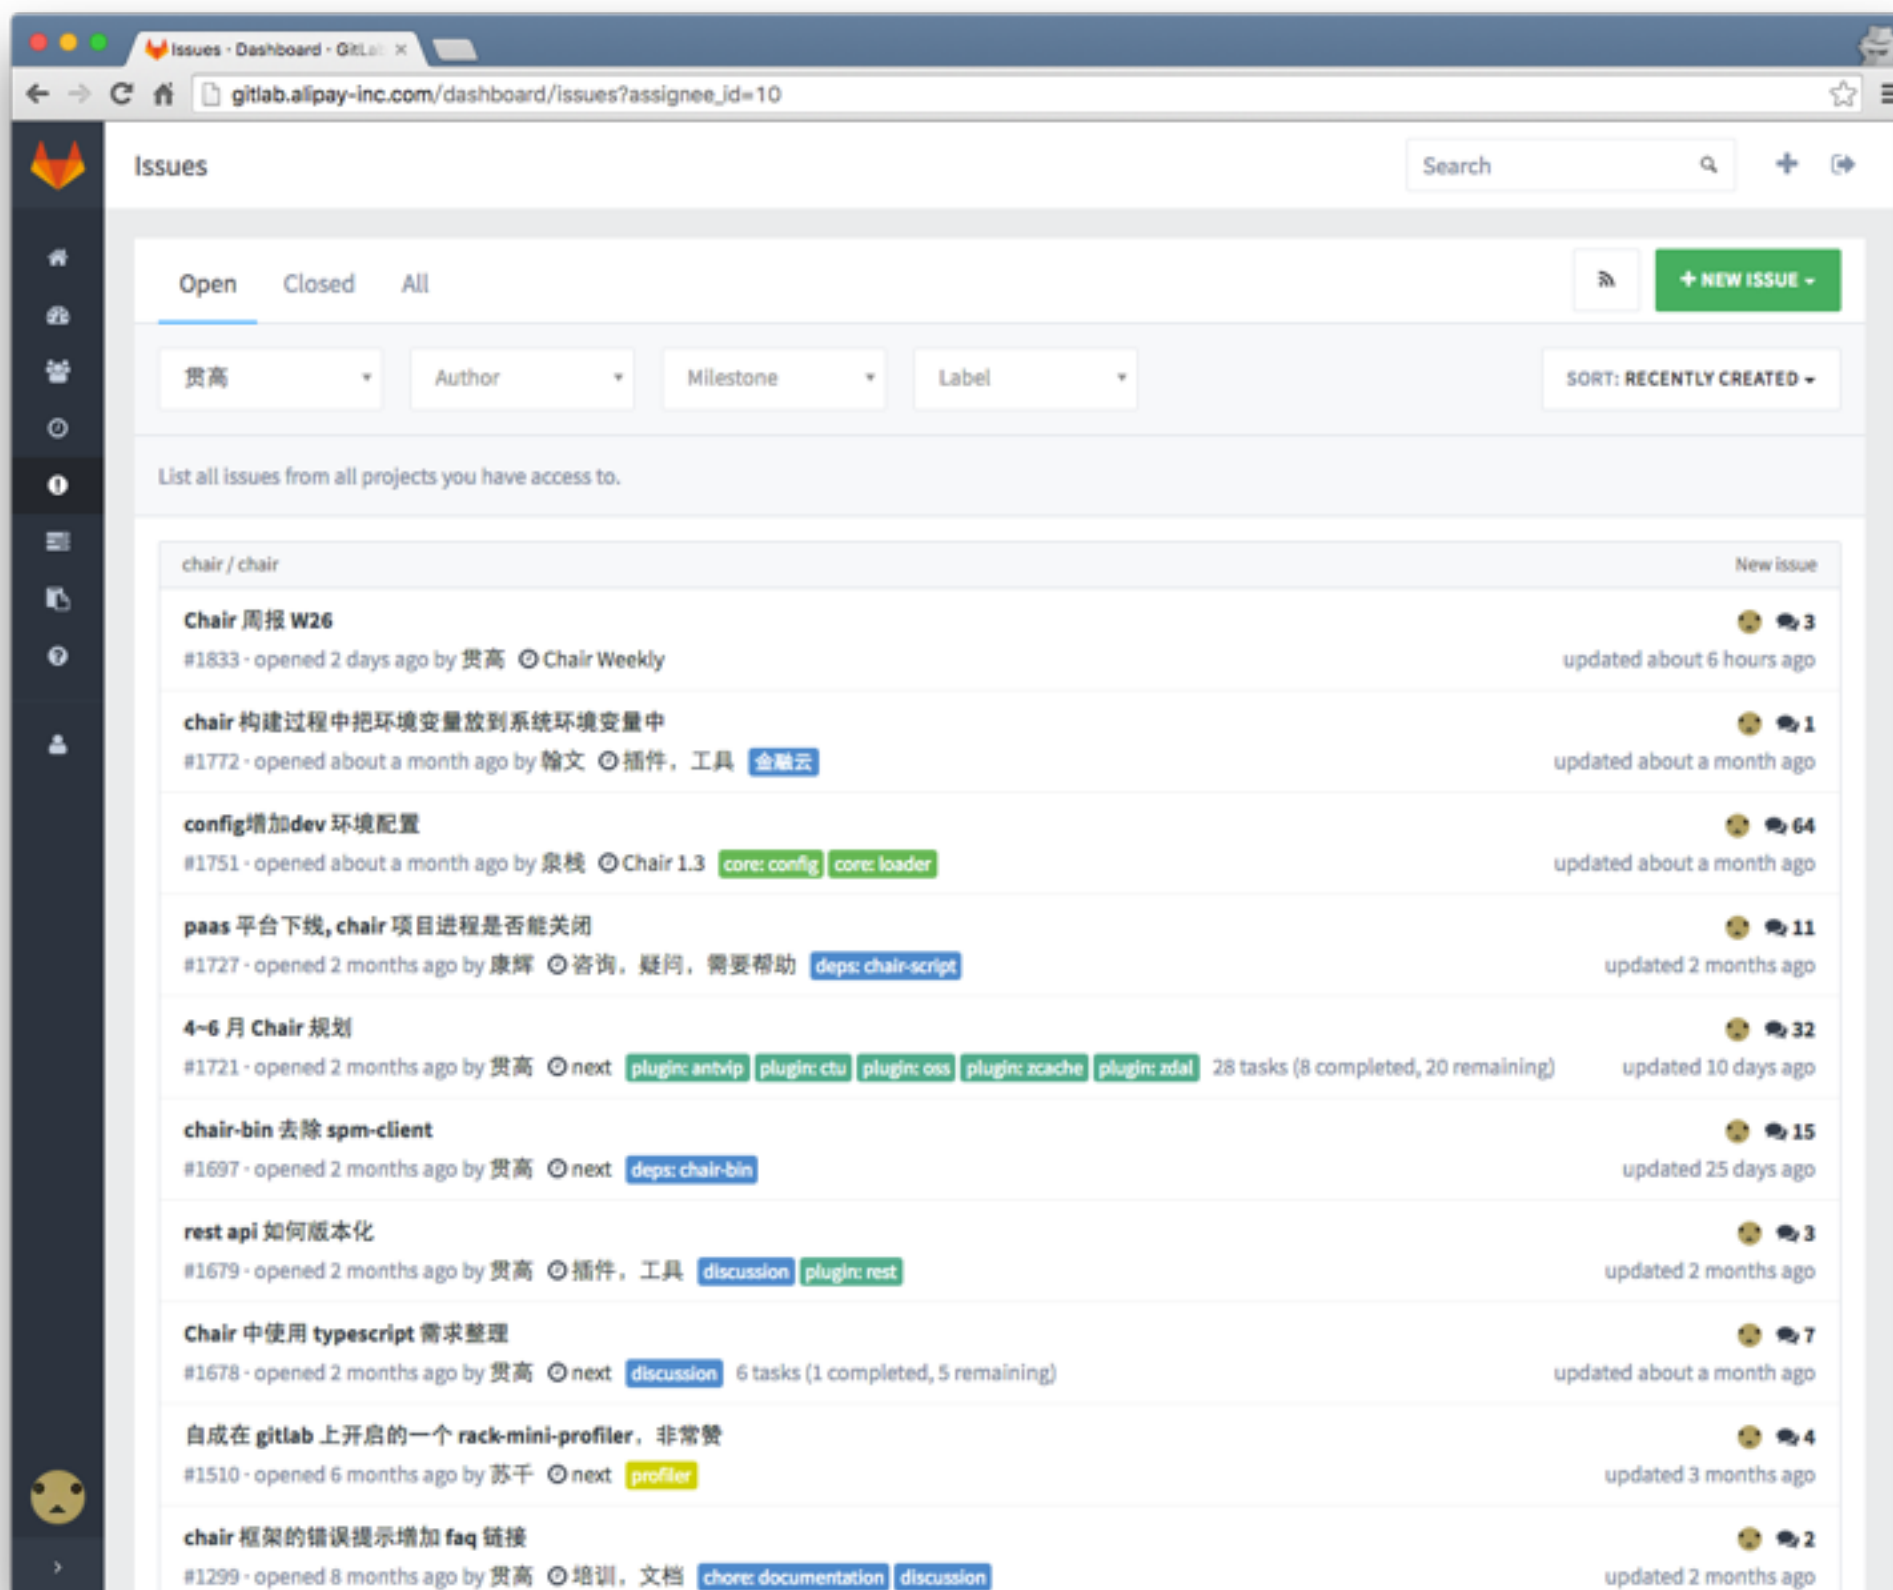

**Projects:**

|                          |          |
|--------------------------|----------|
| antcloud / accommon      | disabled |
| CloudAtlas / Design      | global   |
| avm / avm_ngx_apimg      | global   |
| lengjing / lengjing-demo | global   |
| fengdie / x              | global   |
| ant-tool / x             | global   |
